RESTRICTION

1. Claims 12-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 2-07-05.

2. Applicant's election with traverse of claims 12-20 in the reply filed on 2-07-05 is acknowledged. The traversal is on the ground(s) that the additional claims are not an additional burden on the examiner. This is not found persuasive because the current claims 1-11 are strictly in class 198, while claims 12-20 require a search outside of class 198, in a class with harvestors.

3. The requirement is still deemed proper and is therefore made FINAL.

This application contains claims 12-20 drawn to an invention nonelected with traverse in Paper No. 2-07-05. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

DETAILED ACTION

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3651

5. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the roller" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-7 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Mott (US Pat. No. 6,644,463).

See the attached marked up drawing figures 8 and 9 of Mott depicting the claimed features

8. Claims 1, 4, 6, and 8-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Franzoni et al. (US Pat. No. 6,533,102).

See the attached marked up drawing figures 3 and 4 of Franzoni et al. depicting the claimed features.

Art Unit: 3651
